

Minotour (Up to 24 Passengers)

Thomas' Minotour small bus is fast becoming the leading choice in preschool child transportation. It's versatility, easy handling and safety enhancements make it an excellent vehicle for schools, child care, churches, youth groups and more!

And unlike most passenger vans, the Minotour meets all Federal and State Motor Vehicle Standards for schools buses.

For a small bus, the Minotour is loaded with value-added features, like:

- Full height outward opening entrance doors for easy on and off loading
- A comfortable and adjustable driver's seat
- Easy electrical access and convenient storage area located within driver's reach
- A spacious interior with center aisle
- A body structure that delivers a "big bus" feel
- Optional diesel engine chassis for longer lifespan and fuel economy
- Optional wheelchair lift for specials needs applications

So strong and durable that we parked our 18,000 pound Type D bus on the Minotours roof – without extra reinforcement. Its steel cage construction and one-piece, skirt to skirt steel rafter held up so well that all its windows and doors still opened easily without binding.
